

PIN BENCHMARKING DATA REPORTED TO CAHS

# CORE MEASURES	
CAH ACUTE CARE	
1	Total number of CAH acute care patient admissions.
3	Total number of CAH acute care patient discharges. [DATABANK MEASURE]
5	Average length of stay (LOS) in hours for CAH acute care patients. [DATABANK MEASURE]
7	Total number of CAH emergency department (ED) visits. [DATABANK MEASURE]
CAH SKILLED SWING BED	
8	Total number of CAH skilled swing bed admissions.
9	Total number of CAH skilled swing bed discharges. [DATABANK MEASURE]
10	Average of length of stay (LOS) in days for CAH skilled swing bed patients. [DATABANK MEASURE]
OBSERVATION	
101	Billable observation hours per visit (rate)
102	Billable observation hours to total observation hours ratio (rate)
READMISSIONS AND RETURNS	
103	Acute care rate of unplanned readmissions with in 30 days for any and all cause.
104	Acute care rate of returns to ER (rate)
MISCELLANEOUS CLINICAL MEASURES	
105	Percent blood utilization of crossmatch
CAH ACUTE CARE	
106	Acute care HAI per acute care patient day x 1,000
107	Acute care pressure ulcers per acute care patient day x 1,000
108	Acute care patient falls with injury per acute care patient day x1,000
109	Acute care patient harm events per acute care patient day x 1,000
CAH SWING BED	
110	Swing HAI per Swing patient day x 1,000
111	Swing pressure ulcers per Swing patient day x 1,000
112	Swing bed patient falls with injury per Swing bed patient day x 1,000
113	Swing patient harm events per Swing patient day x 1,000
EMERGENCY DEPARTMENT (ED) TRANSFER COMMUNICATION	
27	Number of CAH ED patients transferred to another healthcare facility.
114	Percent of ED visits transferred
115	Rate of administrative information communicated.
116	Rate of patient information communicated.
117	Rate of vital signs information communicated.
118	Rate of medication related information communicated.
119	Rate of physician information communicated.
120	Rate of nurse generated information communicated.
121	Rate of procedures and test information communicated.
122	Rate of all elements communicated
123	ED Transfer Composite Score
PRODUCTIVITY MEASURES	
37	Salaries as a percent (%) of net patient revenue
38	Days cash on hand.
39	Days in Accounts Receivable [DATABANK MEASURE]
40	Staff Turnover: Total Facility
41	Staff Turnover: Nursing

PIN BENCHMARKING DATA REPORTED TO CAHS

42	Staff Turnover: Non Nursing Clinical Staff
43	Staff Turnover: Non Clinical Staff
44	Charity care as a percent (%) of gross revenue. [DATABANK MEASURE]
45	Bad debt as a percent (%) of gross revenue. [DATABANK MEASURE]
124	Operational cost per adjusted patient day.
125	Labor hours per adjusted patient day.
126	Labor costs per adjusted patient day.
50	Nursing Hours per Patient Day
51	Percent (%) occupancy
127	OR/surgery hours worked per procedure.
128	ED hours worked per visit.
ADDITIONAL MEASURES	
SET A-MISCELLANEOUS UTILIZATION	
129	Percent inpatients transferred
130	First-time C-section rate
SET B-CAH ACUTE CARE PATIENT SAFETY PROCESS MEASURES	
131	Percent of acute care only patients with a skin risk assessment completed within 24 hours of admission.
132	Percent of acute care only patients with a fall risk assessment completed within 24 hours of admission.
SET B-CAH SWING BED PATIENT SAFETY PROCESS MEASURES	
133	Percent of swing bed patients with a skin risk assessment completed within 24 hours of admission.
134	Percent of swing bed patients with a fall risk assessment completed within 24 hours of admission.
135	Swing bed influenza vaccination rate
SET F-SEPSIS	
63	Number of sepsis patients discharged
136	Percent of discharged sepsis patients with serum lactate completed within 3 hours of presentation.
137	Percent of discharged sepsis patients discharged with blood cultures drawn prior to antibiotic administration
138	Percent of discharged sepsis patients receiving broad spectrum antibiotic administration within 3 hours of presentation.
139	Percent of discharged sepsis patients with hypotension and/or lactate \geq 4mmol/L not responding to fluid resuscitation receiving vasopressor immediately.
140	Percent of discharged sepsis patients with hypotension and/or lactate \geq 4mmol/L at presentation who achieve and maintain MAP \geq 65 mm Hg within 6 hours of presentation.
141	Sepsis Composite Score
