<b>POLICY and PROCEDURE</b>	
<b>Title</b>	Blood Alcohol Draws Requested by Law Enforcement
<b>Manuals</b>	CAH-PCGM
<b>Approved By</b>	Date: <u>02/17/2016</u> By: <u>Erik Wood</u> Title <u>CEO</u>

<b>Highlights</b>	<b>Policy Statement</b>
	It is the policy of PMC to provide consistent care and procedures with regard to Blood Alcohol Draws for law enforcement.
	<b>Procedure</b>
<b>Medical Treatment</b>	1. The nurse on duty must first ask the patient if they require medical treatment.
<b>Provider Order</b>	2. A provider order is <i>not</i> required for the drawing of blood to be tested for alcohol content.
<b>Consent</b>	3. The Law Enforcement Officer provides the forms for the consent to have the Blood Alcohol Test.
	4. The patient must consent to have blood drawn and sign the facility Outpatient Registration Consent before the blood is drawn. If verbal or written consent is not given by the patient- <b>DO NOT DRAW THE BLOOD.</b> (See Exceptions). No assessment or vital signs are needed.
<b>Registration</b>	5. Register the patient in Cerner to create an encounter. Insurance information is that of the appropriate law enforcement agency requesting the lab draw.
<b>MHP Checklist</b>	6. Montana Highway Patrol (MHP) will bring a checklist with them and provide the appropriate tube for the blood. The nurse or person drawing the blood is to keep a copy of the checklist and attach it to the Outpatient Registration.
<b>Documentation of Sheriff Draws</b>	7. If the Sweet Grass County sheriff department brings in a patient for a blood alcohol draw they do not bring a checklist with them or the tube. Document your procedure on obtaining the blood draw (same as for MHP) and obtain a red top tube from the lab.
<b>Prep</b>	8. Prep the skin with betadine only. <b>DO NOT USE ALCOHOL</b> to prep skin. Be sure to document this on the Outpatient Record.
<b>Drawing the Blood</b>	9. Draw 10mL of blood; label the tube with the date, time, patient's name and initials of the person drawing the blood. The tube must be sealed before leaving the emergency room.
<b>Officer Presence</b>	10. The requesting officer must be present for the entire blood draw and sign that they witness the entire procedure.
<b>Draw for Medical Treatment</b>	11. If a provider or patient requests a Blood Alcohol to be drawn, the same procedure is used except that a gray top tube is used. The only consent required is the regular consent for care on the registration form. If blood is drawn for law enforcement and per provider order for the care of a patient, there must be a separate registration for each draw.
<b>Exceptions to Draw</b>	12. "Exceptions": The nurse does not draw any blood if the patient refuses to consent except under the following circumstances:
