

## **Madison Valley Hospital-Clinic**

*Madison Valley Hospital-Clinic is a well-equipped 9-bed community hospital with an excellent Laboratory. We are supported by a strong Volunteer Ambulance Service.*

*Besides the normal doctors visits for check-ups, flu shots and other non-emergency needs, a primary focus is local emergency medical care; and if required, transportation of patients to the appropriate "larger care" facilities for further treatment..*

*Other services we offer include: X-Ray, Ultrasound, Physical, Occupational and Speech Therapies. Cardiac periodic clinics are provided by consulting physicians.*
