MBQIP OVERVIEW

Information Provided by Stratis Health Rural Quality Improvement Technical Assistance

The Medicare Beneficiary Quality Improvement Project (MBQIP) is a quality improvement activity under the Federal Office of Rural Health Policy's (FORHP) Medicare Rural Hospital Flexibility (Flex) grant program. Implemented in 2011, the goal of MBQIP is to improve the quality of care provided in critical access hospitals (CAHs) by increasing quality data reporting by CAHs and then driving quality improvement activities based on the data.

CAHs have historically been exempt from national quality improvement reporting programs due to challenges related to measuring improvement in low volume settings and limited resources. It is clear, however, that some CAHs are not only participating in national quality improvement reporting programs, but are excelling across multiple rural relevant topic areas. For example, small rural hospitals that participate in the Hospital Consumer Assessment of Healthcare Providers and Systems (HCAHPS) survey often outperform prospective payment system (PPS) hospitals on survey scores. MBQIP provides an opportunity for individual hospitals to look at their own data, compare their results against other CAHs and partner with other hospitals around quality improvement initiatives to improve outcomes and provide the highest quality care to each and every one of their patients.

As the U.S. moves rapidly toward a health care system that pays for value versus volume of care provided, it is crucial for CAHs to participate in federal, public quality reporting programs to demonstrate the quality of the care they are providing. Low numbers are not a valid reason for CAHs to not report quality data. It is important to provide evidence-based care for every patient, 100 percent of the time. MBQIP takes a proactive approach to ensure CAHs are well-prepared to meet future quality requirements.

Current MBQIP Measures

This guide focuses on measures reported for MBQIP as part of the Flex grant program. Recognizing the evolving nature of health care quality measures, this guide will be updated on a routine basis to align with changes made to MBQIP. A current list of MBQIP measures can be found [here](#).

Purpose of This Guide

This guide is a combination of the *MBQIP Quality Reporting Guide March 2019* published by Stratis Health Rural Quality Improvement Technical Assistance (www.stratishealth.org), as well as lessons learned and resources compiled by the MT Flex Program. This guide is intended to help CAH staff understand the measure reporting process for the MBQIP program. You will find detailed information on measures and their reporting channels.

National MBQIP Resources

[National Rural Health Resource Center](#)

This site includes a MBQIP Resource List, frequently asked questions, and an overview of the MBQIP Program.

[Quality Improvement Implementation Guide and Toolkit for Critical Access Hospitals](#)

Offers strategies and resources to help CAH staff organize and support efforts to implement best practices for quality improvement.

Toolkit includes:

- A quality improvement implementation model for small, rural hospital settings

- A 10-step guide to leading quality improvement efforts
- Summaries of key national quality initiatives that align with MBQIP priorities
- Best practices for improvement for current MBQIP measures
- Simple, Excel-based tool to assist CAHs with tracking and displaying real-time data to MBQIP and other quality and patient safety measures to support internal improvement effort

CART & QualityNet

Overview

CART (CMS Abstraction & Reporting Tool) is a software application, installed on the user's hard drive or server, for the collection and analysis of quality improvement data. Data entered into CART is extracted and uploaded into [QualityNet](#) for Outpatient Quality Reporting (OQR) and Inpatient Quality Reporting (IQR) measures. [The Medicare Beneficiary Quality Improvement Program](#) (MBQIP) uses CART for reporting of certain OQR and IQR measures.

Initial installation of CART requires the installation and setup of Quality Management System (QMS) as the foundation for the CART software. CART has separate inpatient and outpatient modules. These are downloaded separately and will have separate updates. This guide will refer to each module as IP CART (Inpatient CART) and OP CART (Outpatient CART).

Screen shots may appear visually different due to varying computer operating systems and web browsers, but will contain the same information.

Quality Management System (QMS) Initial Installation

1. Install Quality Management System (QMS) by accessing CART downloads.

MBQIP Training Video: Data Abstraction Video Session 2 – [Locating CART](#).

This video provides assistance on how to locate CART. (9-minute video)

CMS Training Video: [CART Basics](#).

This video reviews the basic steps needed to use CART, including how to download the application, log in, create a provider and user set up and navigate through the application (30-minute video).

- Go to <https://www.qualitynet.org/outpatient/data-management/cart>.
- Click on View all versions of CART.
- By clicking on the version lists on the left, choose the version for the discharge time frame you will be entering cases for.

CART Version 1.18.0

CART Version 1.17.2

CART Version 1.18.0 for Encounters 01/01/2020 - 12/31/2020

Upgrading from an existing CART installation

- Scroll down to **Initial Installation of CART**. Click on the **Download** link next to the CART version listing.

Initial Installation of CART

On a workstation *without* a compatible version of CART Inpatient or Outpatient installed (or to install in a different directory), follow these steps:

- Read and follow the CART Installation Instructions
- Download CART-Outpatient 1.18.0

File Name	File Type	File Size	
CART Installation Instructions	PDF		Download
CART-Outpatient 1.18.0	EXE	268 MB	Download

- A note may appear saying that CART Outpatient will begin downloading shortly. Click **Save** to continue the installation process. If an additional security widow appears with the choice to Run or Don't Run click **Run** to continue the installation process.

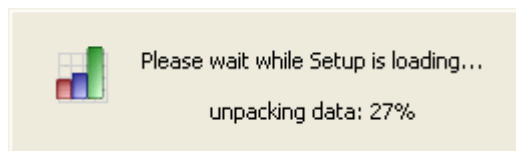

- The WinZip Self-Extractor box will appear with a **Browse** option to select the download location of your

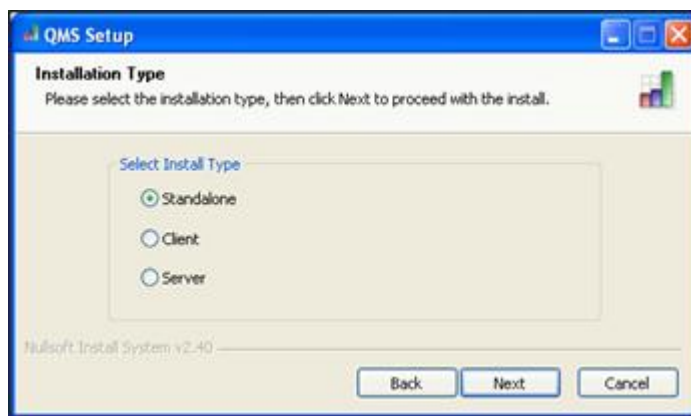

choice, then click **Unzip**. A progress bar will appear and when complete an additional window will appear advising the files were unzipped successfully. Choose **OK** and close the WinZip Self Extractor box. Write down the download location of this file to access later.

- g. Go to the computer download location of the file. Double click on **QMSInstall** file (This will be an .exe file extension). A setup loading window will appear. After the Setup is loaded, the *Welcome to QMS30 Set Up Wizard* window appears. Click **Next**.

- h. Select the installation type (Standalone, Client or Server) that you will be using, then click **Next**. Standalone is the default selection and that means that it will be on your computer's hard drive and only accessed on your computer. Discuss with your IT department your individual needs and get their recommendation on what installation type to use.

Standalone: Select **Standalone** then click **Next**.

Client: Select **Client** then click **Next**. If client is chosen there are specialty instructions for the initial login to CART.

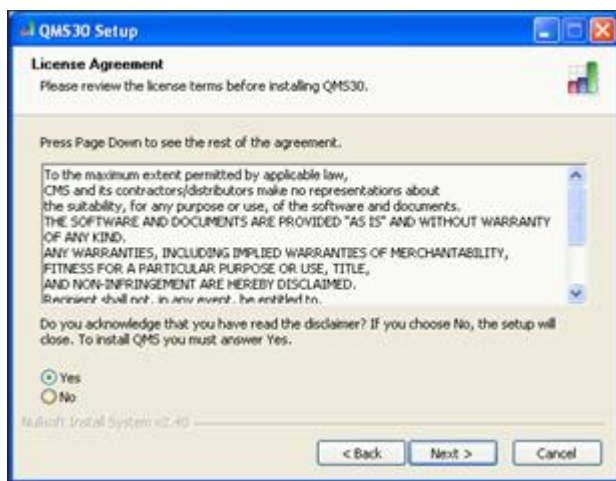

Server: Select **Server** and click **Next**. Enter your Server Port number. The recommended port number is **3311**. Click **Next**.

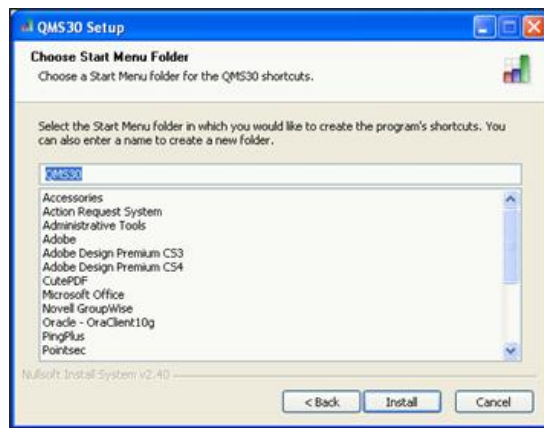

- i. The Installation Directory window will appear. By default, the destination folder contains `C:\QMS30`. You must change the destination folder from `C:\QMS30` to one of your choosing (ex: `C:\OUTPTQMS30`). If you do not have rights to install to `C:\OUTPTQMS30`, choose a different location that you have access to or contact your IT support.

- j. Click **Next**. If you choose a directory that already has an existing QMS installation you will receive an error message. Click **OK** and choose a different directory. Once a correct directory is chosen, a License Agreement Window appears. Choose **Yes** and click **Next**.

- k. Click **Install**. Leave the folder to the default QMS30. An Installation window will show the progress of the installation.

- I. When the installation is complete. Click **Next** to close the window. Click **Finish** to close the QMS30 Setup Wizard window.

CART Inpatient & Outpatient Modules Initial Installation

2. Install CART Inpatient and Outpatient Modules

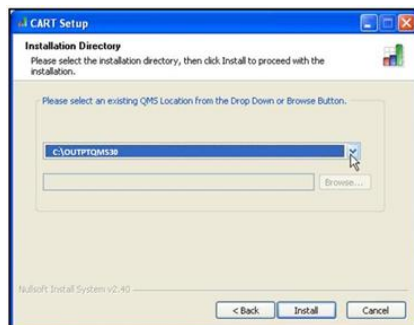

- Navigate to the drive and directory where the installation file(s) were unzipped and saved earlier (ex: C:\OUTPTQMS30).
- Double-click the CART installation filename to begin setup. It will be in one of the following formats depending on the installation type: **CART[...].exe** or **OPPS[...].exe**. A status window will appear. *Welcome to the CART Setup* window appears. Click **Next**.

- A *License Agreement* window appears. Choose **Yes** and click **Next**. For Initial Installation and Upgrade Installations, a *Server Type* window appears. For patch installations see CART Upgrade and Patch Installations on **page X**.

- An *Installation Directory* window appears. Existing QMS installation locations are listed. Select a QMS30 location from the list or click **Browse** to search. Click **Install** to continue. QMS must be installed prior to installing CART. For initial installation and upgrade installations, if you choose a directory that already has the current CART installation, you will receive the following message. Click **OK** and choose a different location. An installation progress window will appear. For patch installations, if you choose a directory that does not have the CART installation being patched, you will receive a warning message and the installation will end.

- e. Click **Next** to close the *Installation Complete* window. Click **Finish** to close the *CART Setup Wizard* window. Typically, a QMS30 icon is placed on the Desktop.

3. Verify the CART Installation Version

- Open CART using the QMS30 shortcut icon. You can log in via either module
- Click About Quality Management System, located on the CART Login screen.
- Verify that the versions you just installed are displayed.
- Exit QMS.

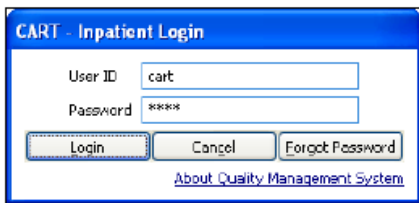

CART Initial Log In Process – User and Provider Set Up

FOR STAND ALONE INSTALLATIONS OF CART

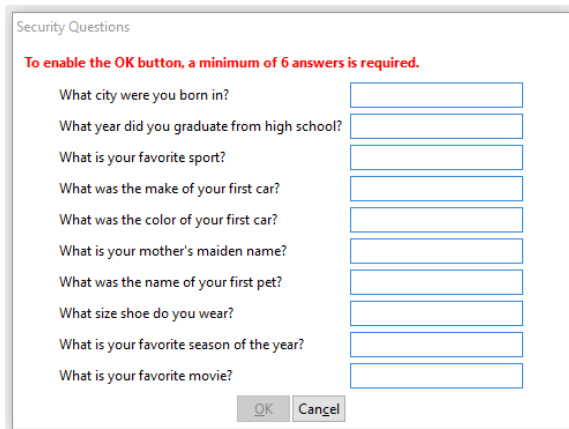

1. Set up username and password to log into CART's inpatient module.

- Click on **QMS 30** on your desk top and choose the **CART- Inpatient** module.
- At the CART-Inpatient login screen, type **cart** (all lower case) for the User ID.
- In the Password field, type **p@ssw0rd** (that's a zero) and click Login. You will be prompted to change your password to one of your choice and will need to enter it twice. *Write this down! Most users will not go into CART frequently and it is easy to forget. Users will need to update their password every **three** months.*

Password Rules: Must be 8-19 characters, at least one upper case, one numeric, and one special character such as: % # * + - , : = ? , . Passwords cannot contain dictionary words. Passwords are case-sensitive. Do not use User ID, first Name, last Name or more than three consecutive like characters. Wait a minimum of six password changes to reuse a password. Do not change the password more than once in a 24 hour period.

- After the password is set, you will be prompted provide answers to *Security Questions*. Answer any 6 of the 10 questions, then tab out of the last field. *Take a screen shot or record your answers and save with your password before you click OK!*

2. Set up Provider (Hospital) information in CART's Inpatient Module.

This has to be done before completing your account.

- While logged into CART, go to the top of the page and click on **Administration > Provider**.

- A *Provider Detail* box will appear on the right. Enter all the bolded fields, the time frame, and measure

preferences. Choose other measures only if they are by your hospital or a requirement of another program.

Inpatient: ED

Outpatient: AMI, Chest Pain, Pain Management, ED Throughput

- c. If you do not know your CMS Certification number, please contact the Flex Grant and we can provide that to you. It will be a 6 digit number starting with 2713___. Save this information by clicking on the **Save** icon in the upper left menu bar.

▼ Provider Detail * = Required Field

Name*	Montana CAH
Address 1*	1200 Hospital Drive
Address 2	
Zip*	59888-
City*	Everywhere

Montana CAH - 271001

- b. Exit out of CART then reopen and choose **CART-Inpatient**.

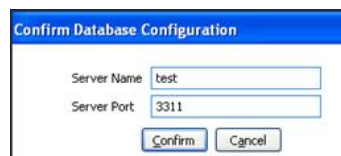

- c. Enter User ID for main account and type in the CART default password of **p@ssw0rd** (that's a zero). Click **Login**.
- d. CART will prompt to change the password. Enter the password you created and answer your security questions again. When complete it will go to a blank screen. To make sure the User ID and password work logout and log back in using the User ID and Password you created.
- e. Repeat steps 9 and 10 for the backup account. Use the backup account User ID and the same security questions as before.

4. Set up CART's Outpatient Module

- a. Follow the steps 1-3 for Outpatient CART with the differences below.
- b. Login to CART-Outpatient Initial User ID is **opps** and password is the same - **p@ssw0rd** (that's a zero).

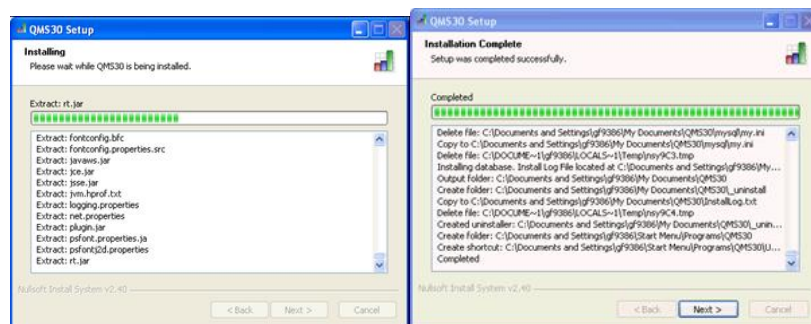

CLIENT-BASED INITIAL LOG-IN INSTRUCTIONS: Refer to QMS Installation #8 on page 3.

1. Upon initial login to CART on a Client, you will be prompted to confirm the **Database Configuration**:
 - a. Enter your **server's IP address or name**.
 - b. Enter the **port number** used with the server installation. The recommended port number is **3311**. This must only be entered once.
 - c. Click **Confirm**.

A dialog box titled "Confirm Database Configuration" with a blue header. It contains two input fields: "Server Name" with the text "test" and "Server Port" with the text "3311". Below the fields are two buttons: "Confirm" and "Cancel".

2. If the server has a QMS version prior to QMS 3.0.0 installed but does not have a QMS 3.0.0 Server Installation, an "Incompatible Database Found" message displays during the first attempt to login to the client workstation.
3. If you did not receive an error message, stop here. Otherwise, click **OK** to close the message window and continue.
4. Perform the QMS 3.0.0 Client installation and perform a compatible CART installation.
5. Enter the correct **IP Address and Port Number** and proceed to **Login**. An *Installing* window shows the progress of the installation. Click **Next** to close the *Installation Complete* window.

6. Click **Finish** to close the *QMS30 Setup Wizard* window and follow initial log in instructions above.

CART Modules Update & Patches Installation

CART will have updates depending on a change in calendar year, coding, etc. MT Flex will notify when an update or patch is pending and for what period of discharges. This will need to be repeated for both Inpatient and Outpatient. See CART Initial Installation #10 on page 8 for instructions to find your current CART IP and OP versions.

*Pay attention to version numbers! This is where keeping record of what version of CART you've downloaded most recently is helpful. For example, if you have version 1.15.1, you will want the patch to get to version 1.15.2. If you have version 1.14 you will want to upgrade to 1.15. Communication from MT Flex Grant will indicate if CART is an upgrade or a patch. Most often it will be an **upgrade**.*

1. Go to <https://www.qualitynet.org/outpatient/data-management/cart>.
2. Click on View all versions of CART.
3. By clicking on the version lists on the left, choose the version for the discharge time frame you will be entering cases for.

CART Version 1.18.0	CART Version 1.18.0 for Encounters 01/01/2020 - 12/31/2020
CART Version 1.17.2	Upgrading from an existing CART installation

4. From the top section, titled “Upgrading from an existing CART installation”, click on **the Download link** next to the upgrade version. The program installation file will begin downloading and will take several minutes.

Upgrading from an existing CART installation

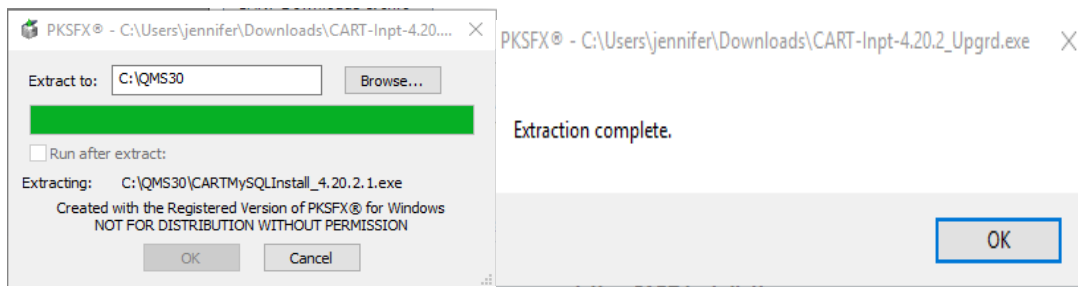

Compatibility: CART-Outpatient 1.18.0 is compatible with CART-Outpatient 1.14 or newer versions. It is also compatible with CART-Inpatient 4.21 or newer versions and may be installed in the same directory.

If any compatible CART version (Inpatient or Outpatient) is installed on the workstation, follow these instructions to upgrade to CART-Outpatient 1.18.0:

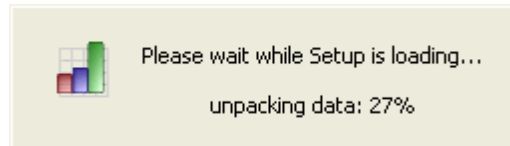

1. Read and follow the CART Installation Instructions
2. Download the CART-Outpatient 1.18.0 Upgrade

File Name	File Type	File Size	
CART Installation Instructions	PDF		Download
CART-Outpatient 1.18.0 Upgrade	EXE	158 MB	Download

5. A *security warning window* will appear. Click **Save** to continue the installation process. Depending on web browser settings an additional security widow may appear with the choice to **Run** or Don't Run. Click **Run** to continue the installation process.
6. A zip file extractor will appear with a **Browse** option to select the download location. Use previous QMS folders for simplicity. A progress bar will appear and when complete an additional window will appear advising the files were unzipped successfully. Choose **OK** and close the *WinZip Self Extractor* box.

7. Go to the computer download location of the file. And click on **CARTMYSQLINSTALLversion**.

8. The *CART Setup Wizard* will open. Click **Next**. A *License Agreement* window appears. Choose **Yes** and click **Next**.

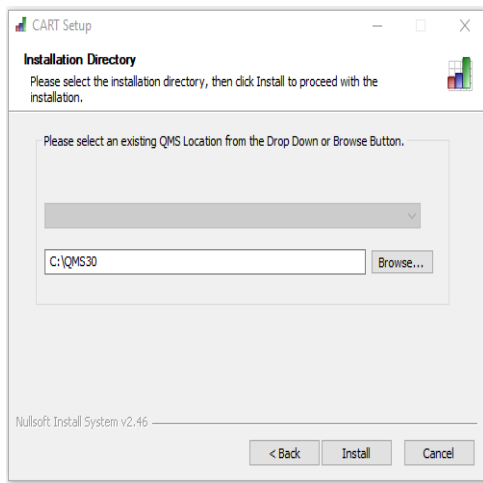

9. A *Server Type* window will open. Choose **MYSQL** and click **Next**.

10. An *Installation Directory* window appears. Existing QMS installation locations are listed. Select a QMS30 location from the list or click **Browse** to search. Click **Install** to continue.

11. A progress bar will appear with a message when the download has been completed.

Log in and set time frame measures The time period drop down is typically organized by module versions and updates. If you do an update to CART, you will need to select the new time period and choose measures for that. In the example screen shot below, if I still needed to enter 4Q 2017 cases, I would choose **Time Period 01/01/2017 – 12/31/2017 (1.19)** and check IQR-ED and IQR-IMM for that time period as. If you do not have measures selected for the time period you are entering, you will not be able to enter data.

12. Repeat for IP Cart module

CART Access Maintenance

See the “cheat sheet” image below for an example to organize your access information. Save a document or print hard copy and put in a CART file folder. It doesn’t have to be fancy; mine is handwritten! Just remember to update when CART prompts your password to be updated (every three months).

LOCKED OUT OF CART?

1. Select the CART login screen for the module you are locked out of (Inpatient or Outpatient)
2. Login with your back up account.
3. Go to **Administration > User** and select the User ID that is locked out. Under User Type, check the box that says **Reset Password/Unlock the Account** and **save**. Exit out of CART.

▼ User Detail * - Required Field

User ID* JenBackUp

First Name* JenBackUp

Middle Name

Last Name* Wagner

User Type* System Administrator
Abstractor

☒ Reset Password/Unlock The Account

▼ Activation Detail

Activation Date* 05-15-2017

Termination Date - -

▼ Provider Detail

Montana CAH - 271001

4. Log back into CART and enter the User ID that was locked out and **p@ssw0rd** for the password. The system will prompt for a new password. When a blank screen appears it is complete.
5. Log out and back in to test new password.

CART Entering Data & Exporting Abstractions

Tips & Tricks – Actual abstraction of data will differ for each hospital.

- Use two monitors and abstract directly from your EMR.
- Abstract and enter data on paper tools, then enter into CART. Paper tools can be found on the QualityNet website at the links below. Select the correct discharge period.

[Inpatient](#)

[Outpatient](#)

- Depending on report capabilities of each EMR, hospitals may be able to directly import and export data to CART or QualityNet. However, due to the difference in EMRs those steps are not included in this guide and MT Flex is working on education modules to support this process.

1. **Log in to the appropriate CART module.** (Example uses Inpatient ED Throughput)

2. **Enter patient details into CART.**

- a. Click on **Administration > Patient**
- b. Enter required patient data and click **Add Patient** and **Yes** on the pop up.

The screenshot shows the 'Patient Detail' form in the CART system. The form includes fields for First Name, Last Name, Sex, Birthdate, Race, Hispanic Ethnicity, Patient Identifier, and Provider. A 'Save Resource' dialog box is open in the foreground, asking 'Patient has been modified. Save changes?' with 'Yes', 'No', and 'Cancel' buttons. The 'Add Patient' button is visible at the bottom of the form.

3. **Enter abstraction details for the encounter.**

- a. Double click on the Patient in the **Patient Summary** area on the left. Complete the pop up, tabbing through the fields and click **Finish**.

The screenshot shows the 'Patient Summary' table with columns for First Name, Last Name, Patient Identifier, Provider, Birthdate, and Race. The patient 'Jane Doe' is highlighted. To the right, the 'Abstraction' form is open, showing fields for Admission Date, Discharge Date, Measure Set, Abstraction ID, Abstraction Date, Vendor Tracking Identifier, and Comment. The 'Add/Edit Abstraction for patient Jane Doe' title is visible at the top of the form.

- b. Enter information for **bolded** questions. (Bolded questions are required)

Navigator

- IQR-Emergency Department
 - Abstraction
 - 1. Enable/disable questions (SKIPATTERN)
 - 2. ICD-10-CM Principal Diagnosis Code (PRINDX)
 - 3. Were there ICD-10-CM Other Diagnosis Codes (OTHRDX#A)
 - 4. Was there ICD-10-PCS Principal Procedure Code (PRINPX#A)
 - 5. Were there ICD-10-PCS Other Procedure Codes (OTHRPX#A)
 - 6. Payment Source (PMTSRCE)
 - 7. Postal Code (POSTALCODE)
 - 8. Sample (SAMPLE)
 - 16. Physician 1 (PHYSICIAN_1)
 - 17. Physician 2 (PHYSICIAN_2)

Abstraction

1. Would you like the questions to be enabled or disabled appropriately per the measure algorithms, or

☐ Enable/disable questions appropriately

☐ Enable all questions

2. What was the ICD-10-CM code selected as the principal diagnosis for this record? (PRINDX) ?

3. Were there ICD-10-CM Other Diagnosis Codes? (OTHRDX#A) ?

Grid

- Question 1: Always choose to “**Enable/disable questions appropriately**” so you don’t waste time entering unneeded data.
 - ICD-10 Code: Start typing in the code and the list will begin to populate.
 - Chest pain measures are the only measures that use secondary diagnosis codes. They are not required for other measures.
 - Pay close attention to dates for arrival, admit, and discharge; especially if it’s over midnight as this could result in an outlier if entered wrong.
 - Physician Identifiers are not required. Save time and effort and only enter if being used by the facility.
- c. When all required data is entered, the bolded questions on the left will disappear. Click the **Save** icon in the upper left. A pop up will appear asking if you wish to duplicate. Choose **OK** if the patient falls into another measure set. Choose **Cancel** if you are done with the patient. Close *Abstraction* window.

Navigator

- IQR-Emergency Department
 - Abstraction
 - 3. Were there ICD-10-CM Other Diagnosis Codes (OTHRDX#A)
 - 4. Was there ICD-10-PCS Principal Procedure Code (PRINPX#A)
 - 5. Were there ICD-10-PCS Other Procedure Codes (OTHRPX#A)
 - 16. Physician 1 (PHYSICIAN_1)
 - 17. Physician 2 (PHYSICIAN_2)

Abstraction

5. Were there ICD-10-PCS Other Procedure Codes? (OTHRPX#A) ?

6. What is the patient's source of payment for this episode of care? (PMTSRCE) ?

☒ Source of payment is Medicare

☐ Source of payment is Non-Medicare

7. What is the postal code of the patient's residence? (POSTALCODE) ?

59601

8. Does this case represent part of a sample? (SAMPLE) ?

☐ The data represents part of a sample.

☒ The data is not part of a sample; this indicates the hospital is performing 100 percent of the discharge

9. Was the patient an ED patient at the facility? (EDPATIENT) ?

Abstraction COMPLETE

This abstraction is now COMPLETE. Do you wish to duplicate this record?

☐ Disable this alert.

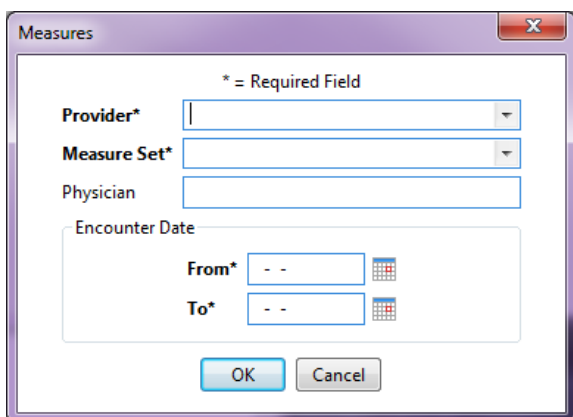

OK Cancel

- d. Repeat this process for each case.

Run Reports in CART

Run summary reports in CART before uploading into QualityNet for submission. Doing this will help you identify possible errors before submission, making it easier to fix.

1. Log into the appropriate CART Module.
2. Click on Reports and choose Measures from the drop down.
3. Complete the Measures dialogue box with the following:
Provider: Your Hospital
Measure Set: OQR-AMI, OQR-CP, OQR-ED
Physician: leave blank
Encounter Date: Date range for the month or quarter data is requested.

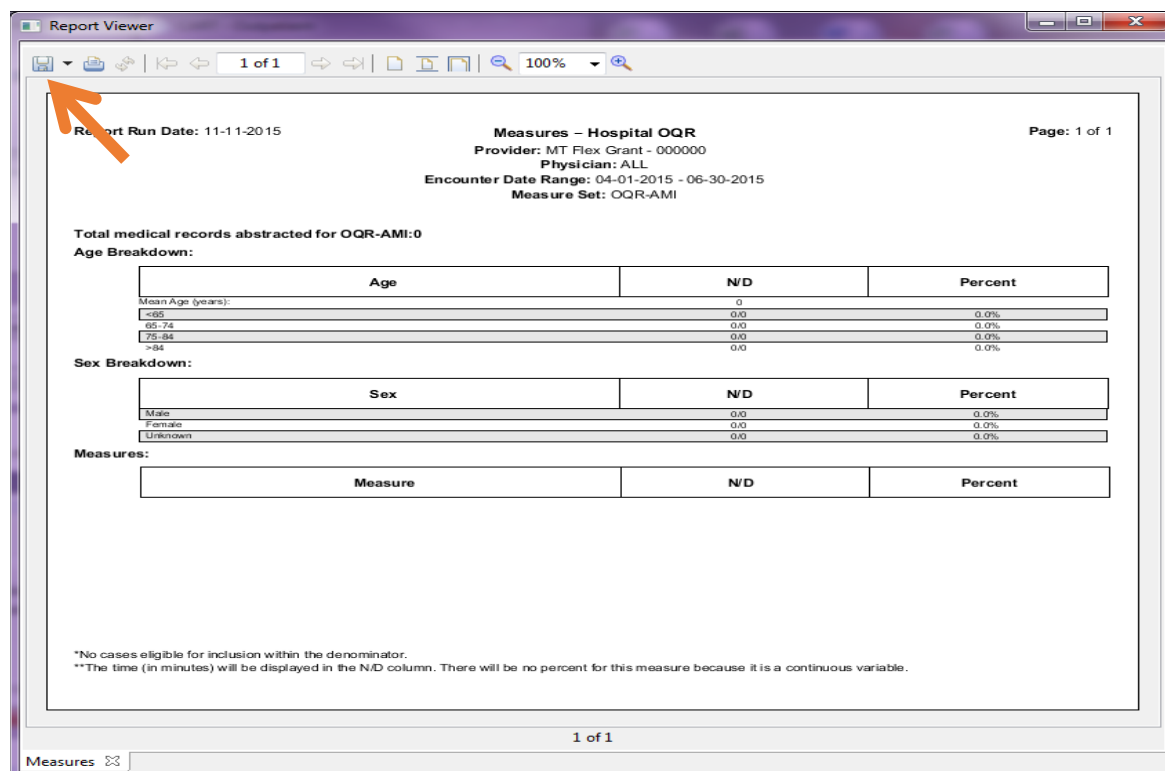

The Measures dialog box contains the following fields:

- Provider***: A dropdown menu.
- Measure Set***: A dropdown menu.
- Physician**: A text input field.
- Encounter Date**: A section containing:
 - From***: A date input field with a calendar icon.
 - To***: A date input field with a calendar icon.

Buttons at the bottom: OK, Cancel.

4. Click OK and the Report Viewer screen will appear with the report for the requested measure. The example screen shot is blank so to keep hospital data confidential.
5. Click on the save icon indicated by the arrow and choose Export as PDF.

Report Run Date: 11-11-2015

Measures – Hospital OQR
Provider: MT Flex Grant - 000000
Physician: ALL
Encounter Date Range: 04-01-2015 - 06-30-2015
Measure Set: OQR-AMI

Unknown	0.0	0.0%

Measures:

Measure	N/D	Percent
---------	-----	---------

*No cases eligible for inclusion within the denominator.
**The time (in minutes) will be displayed in the N/D column. There will be no percent for this measure because it is a continuous variable.

Page: 1 of 1

Edit & Access Patient and Abstraction Data

1. Search By Abstraction

- By just clicking **Search** at the top, all current abstractions will come up.
- Click on the field heading in **Patient Summary** to sort abstractions.
- You can also enter specific data to search for.
- Double click on the patient/abstraction to edit.

Patient Information

▼ Search

Field Name **3** Condition Field Value

1 Search Clear

<< < (1 - 34)

▼ Patient Summary **2**

First Name	Last Name	Patient Identifier	Provider	Birthdate	Race	Sex	Hispanic Ethnicity

Edit Abstraction Information Edit Abstraction Duplicate Case Export Delete Abstraction

2. Export Abstractions

- Click on **Export** and an Export pop up will appear.
- Choose **Zip** as file type and Browse to the appropriate location on your own computer system. Everything else will stay the same. Make note of the file path to access the export when you upload into

QualityNet.

The image shows a software dialog box titled "Export" with a subtitle "Abstraction Export". Below the subtitle is the text "Export Abstraction(s)". A note at the top right of the main area states "* = Required". The dialog contains several sections with radio buttons and a dropdown menu:

- File Type***: Radio buttons for Xml, Zip (selected), Excel, and CSV.
- Measure Type***: A dropdown menu currently showing "CMS Measures".
- Export Type***: Radio buttons for CMS (selected) and "The Joint Commission (COMPLETE Cases Only)".
- Action Type***: Radio buttons for Add (selected) and Delete.
- Location***: A text field containing "C:\QMS30\workspace\Inpatient\export" and a "Browse..." button.

At the bottom right, there are two buttons: "Finish" and "Cancel".

- c. A pop up indicating *"The export process has completed"* will appear, click **close**. Some users may get an additional pop up asking if you would like files to be uploaded to the data warehouse now. You can choose yes or no; choosing **Yes** will open the [QualityNet website](#).

Getting Started in QualityNet

As of Summer, 2020 users can access file upload in QualityNet through the [HARP sign in](#); previously the QualityNet Secure Portal.

1. Create HARP Sign In

- a. [HCQIS Access Roles and Profile page](#) at <https://harp.qualitynet.org/>.
- b. Log into [HARP Sign In](#) at <https://hqr.cms.gov/hqrng/login> with your HARP user name and password.
- c. Set up at least one QualityNet Security Administrator (SA). It is highly recommended that hospitals designate at least two QualityNet SAs – one to serve as the primary QualityNet SA and the other to serve as backup.
- d. Go to **My Profile** (Under your User Name in the upper right).
- e. From this page, you can **Request** access, and **View Current Access**.
- f. Select **Basic User** or **Security Administrator/Official** when prompted to select a user type.
- g. Select your required permissions and click **submit an access request**.
- h. You will be notified by email when your request has been approved.

2. Access the HARP Sign In (formerly QualityNet Secure Portal)

For access to the complete the Enrollment Process. As part of the process, you'll be asked to change your password and answer a set of security questions

3. Maintain an Active QualityNet Security Administrator (SA)

Hospitals are required to maintain an active QualityNet SA. To maintain an active account it is recommended that QualityNet SAs log into their account at least once per month. If an account is not logged into for 120 days it will be disabled. Once an account is disabled, the user will need to contact the QualityNet Help Desk to have their account reset.

4. Complete a Notice of Participation (NoP)

In order for a hospital to have their inpatient data publicly reported, a NoP must be completed. The inpatient NoP is not required for participation in the Medicare Beneficiary Quality Improvement Project (MBQIP), but must be completed for data submitted to QualityNet to appear on Hospital Compare. To verify if your hospital has completed a NoP, or needs to complete a NoP for the first time:

- a. Log into the [HARP Sign In](#)
- b. On the left navigation pane select **Administration**, then **Notice of Participation**
- c. From here, you can view the NOP Status for your programs, choose to participate, not participate, or request withdrawal. You can also change the contact information for your facility NOP. Once your hospital's NoP is accepted, it remains active unless your hospital changes its pledge status.

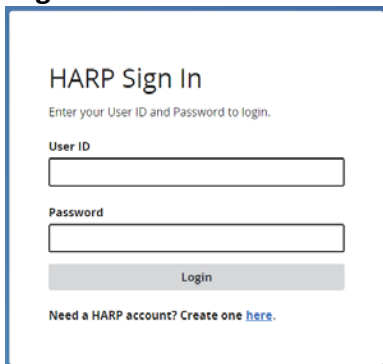

Note – A NoP is no longer required for outpatient data. Such data will automatically be made publicly available unless it meets data suppression requirements set forth by Hospital Compare.

Submitting Data to QualityNet (aka the CMS Warehouse)

1. Submit Data to the CMS Warehouse (QualityNet)

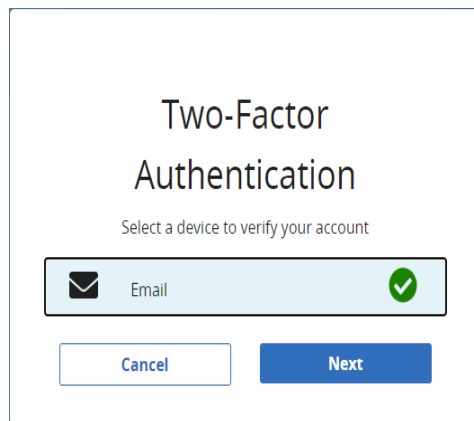

Clinical data submission is accomplished in one of two ways: uploading from Outpatient CART or by a third party vendor. Third party vendors must be able to meet the Measurement Specifications for data transmission via the HARP Sign In (formerly QualityNet Secure Portal) to the CMS Clinical Warehouse. Data Submissions must be timely. Refer to each domain/measure for timeframes.

- a. Go to the [HARP Sign In](https://hqr.cms.gov/hqrng/login) (<https://hqr.cms.gov/hqrng/login>), enter your credentials and click on **Login**.

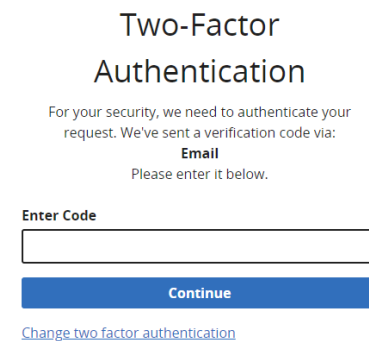

The screenshot shows the 'HARP Sign In' login page. It has a title 'HARP Sign In' and a subtitle 'Enter your User ID and Password to login.' Below this are two input fields: 'User ID' and 'Password'. A 'Login' button is positioned below the password field. At the bottom, there is a link that says 'Need a HARP account? Create one [here](#).'

- b. Verify 2-factor authentication

The screenshot shows the 'Two-Factor Authentication' screen. It has a title 'Two-Factor Authentication' and a subtitle 'Select a device to verify your account'. There is a selection bar with an envelope icon, the text 'Email', and a green checkmark. Below this are two buttons: 'Cancel' and 'Next'.

The screenshot shows the 'Two-Factor Authentication' screen for entering a code. It has a title 'Two-Factor Authentication' and a subtitle 'For your security, we need to authenticate your request. We've sent a verification code via: **Email** Please enter it below.' Below this is a text input field labeled 'Enter Code' and a blue 'Continue' button. At the bottom, there is a link that says '[Change two factor authentication](#)'.

- c. Scroll to the bottom of **Terms and Conditions** and click **Accept**.

Terms & Conditions

transiting or stored on this system. At any time, and for any lawful Government purpose, the government may monitor, intercept, and search and seize any communication or data transiting or stored on this system.

Any communication or data transiting or stored on this system may be disclosed or used for any lawful Government purpose.

I accept the above Terms and Conditions

- d. Click on  in the left side navigation panel for **Data Submission**.

- e. Choose **Chart Abstracted** from the top tabbed menu. (the program defaults to eCQM)

eCQM	Web-based Measures	Population & Sampling	Chart Abstracted	HCAHPS
------	--------------------	-----------------------	-------------------------	--------

- f. Change “**Submission**” from Test to **Production** in the drop down and click **Change Selection** to save this submission type.

Submission

Production

Change Selection

- g. Click on  and follow the prompts to upload files.

- h. When the upload process is complete, you will get an email that indicates **Accepted/Rejected** status and the status in the portal will show as  **Received**.

2. Population & Sampling Submission (aka Zero Cases)

- a. Reporting population data for measure sets with no cases is important to the story of rural relevant measures AND to meeting MBQIP participation requirements.

- b. While in the **HARP Sign In**, choose **Population & Sampling** from the top tabbed menu.

eCQM	Web-based Measures	Population & Sampling	Chart Abstracted	HCAHPS
------	--------------------	----------------------------------	------------------	--------

- c. Click on **Data Form**, then **Launch Data Form** for **OQR**.

Select the Data Form

- d. Select the appropriate **Reporting Period** from the drop down in the upper right.

Hospital Outpatient: Population & Sampling

Reporting Period

NOTE: Proceeding with data submission will change a Providers status to **Participating** if they are currently **Not Participating** or **Withdrawn**.

- e. Click on to the right of the measure set you are reporting on. Specifically for MBQIP we are only looking at reporting if there are zero encounters for the metric. CAHs are not required to submit all population data. We would expect that OQR-AMI would be the only set that this information will be submitted for. All CAHs should have ED populations for OQR-ED Throughput, and OQR-Stroke is voluntary and not part of the measure set.

- f. Under **Sampling Option**, choose **Not Sampled** or **N/A submission not required**.

Sampling Option *

- g. Put **0** in all Population and Sampling Fields

Population

All fields must be filled in. If you have no data for a particular item, you must put in '0'.

	July	August	September	Total
Medicare	<input type="text"/>	<input type="text"/>	<input type="text"/>	0
Non-Medicare	<input type="text"/>	<input type="text"/>	<input type="text"/>	0
Total	0	0	0	0

Sampling

All fields must be filled in. If you have no data for a particular item, you must put in '0'.

	July	August	September	Total
Medicare	<input type="text"/>	<input type="text"/>	<input type="text"/>	0
Non-Medicare	<input type="text"/>	<input type="text"/>	<input type="text"/>	0
Total	0	0	0	0

- h. Click . If successful it will show as

National Health Safety Network (NHSN)

1. Enroll in NHSN

2. Follow NHSN Components

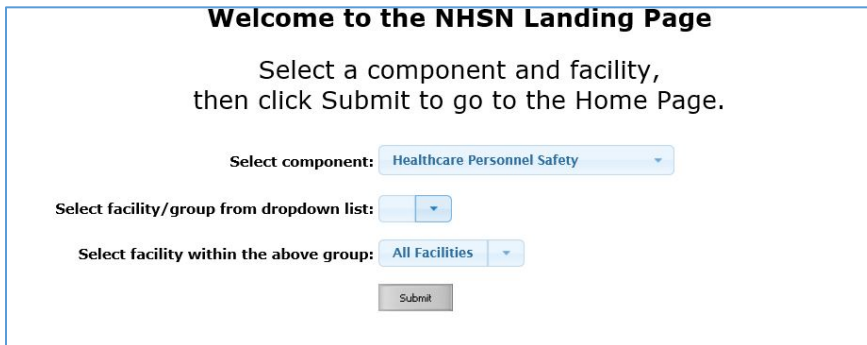

- Log into: <https://nhsn2.cdc.gov/nhsn>. This will take you to the NHSN Landing Page
- Select any Component.
- On the left blue side bar choose Facility, then Add/Edit Component.
- Check Patient Safety and Healthcare Personnel Safety. You may be prompted to enter a contact for each component. You can enter an existing user or add a user by:
 - Click on Users on left blue side bar and then “Add”.
 - Complete User ID (created by the facility), First Name, Last Name, Email.
 - Save user and “Edit User Rights” screen will appear. Confer appropriate rights.

3. Join MHA User Groups (Flex and HIIN Data)

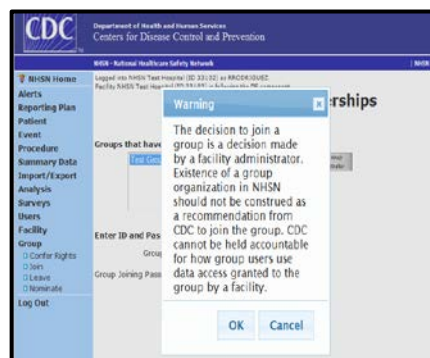

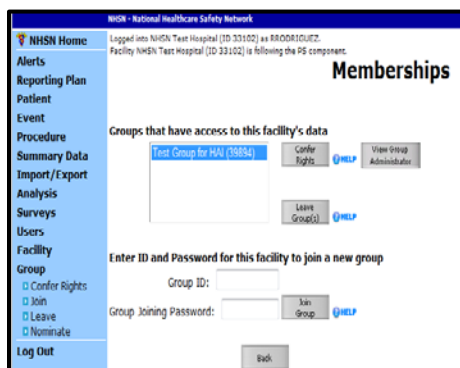

These steps must be performed by a facility’s NHSN administrator. Contact nhsn@cdc.gov if you do not know your facility’s NHSN administrator or if you have technical issues with NHSN. You will need to complete the process for each the Healthcare Worker Immunization Component and Patient Safety Component

4. Joining the MT Flex/HiIN Group in NHSN – Healthcare Personnel Safety Component

- Log into NHSN and select the Healthcare Personnel Safety (MT Flex/MBQIP)

- In the left column, click on Group, then Join. This will take you to the Memberships screen. Enter the **Group ID 44933** and Group Joining **Password flexhen**. Click Join Group. A pop-up warning message will appear. Click ok. You have now joined the group.

- c. MT Flex Group Data Template: On the next screen, (Confer Rights-Patient Safety), you will be able to review the data to which the MT Flex group will have access. Scroll down the screen to review the confer rights template.
- d. Under the section titled “General,” the template shows the MT Flex group will have access to: Patient data with NO identifiers, Healthcare Safety Monthly Surveillance Plan, Annual (HPSFACSURVEY), Seasonal Flu Survey, HPS Data Analysis, Facility Information

Healthcare Personnel Safety	
General	
HCW	<input type="radio"/> With All Identifiers <input checked="" type="radio"/> Without Any Identifiers
Healthcare Safety Monthly Surveillance Plan	<input checked="" type="checkbox"/>
Annual (HPSFACSURVEY)	<input checked="" type="checkbox"/>
Seasonal Flu Survey	<input checked="" type="checkbox"/>
HPS Data Analysis	<input checked="" type="checkbox"/>
Facility Information	<input checked="" type="checkbox"/>

- e. To accept the reporting template and confer rights to your data to the MT HEN 2.0 group, please press “Accept” at the bottom of the page. You will receive a message saying your rights have successfully been conferred – the group name in your message with be “MHA_FLEX_H (44933)”

Conferred Rights saved successfully for group Test Group_RR (43523).

5. Joining the MT Flex/HIIN Group in NHSN – Patient Safety Component

- a. Log into NHSN and select the Patient Safety Component (HIIN)

Welcome to the NHSN Landing Page

Select a component and facility,
then click Submit to go to the Home Page.

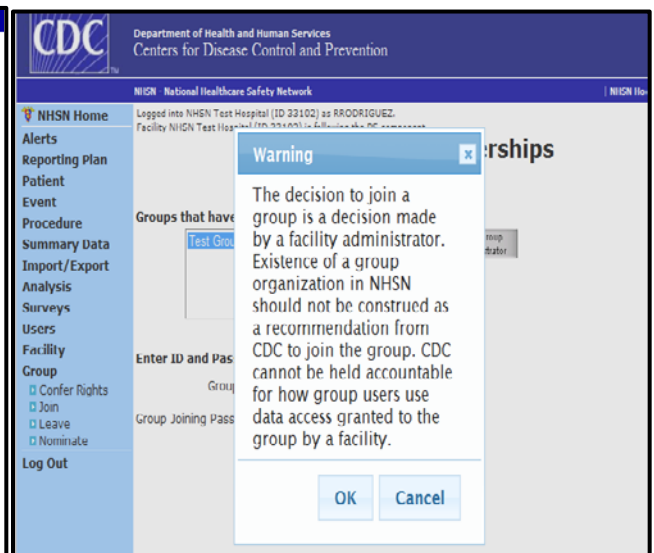

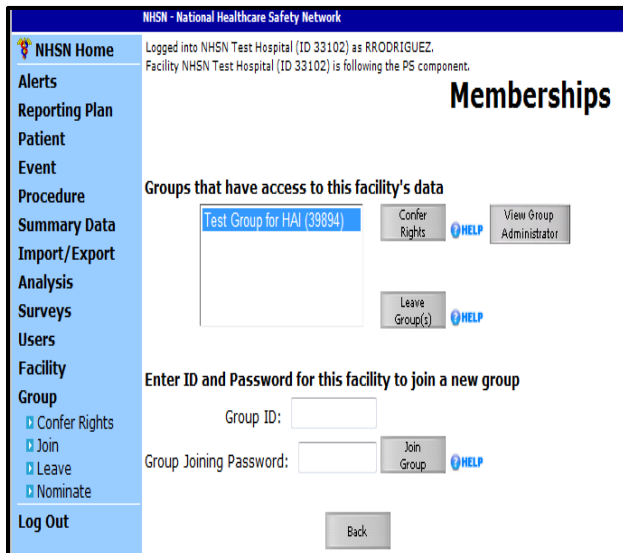

User: **RRODRIGUEZ (ID 147981)**

Select component: Patient Safety

Select facility/group from dropdown list: Fac: NHSN Test Hospital (ID 33102)

[Get Adobe Acrobat Reader for PDF files](#)

- b. In the left column, click on Group, then Join. This will take you to the Memberships screen. Enter the **Group ID 44933** and Group Joining Password **flexhen**. Click Join Group. A pop-up warning message will appear. Click ok. You have now joined the group.

c. Patient Safety Group Data Template

- d. On the next screen, (Confer Rights-Patient Safety), you will be able to review the data to which the MHA will have access. Scroll down the screen to review the confer rights template. Under the section titled “General,” the template shows the MHA will have access to: Patient data with NO identifiers, Monthly Reporting Plans, Rights to analyze your data, Facility Information, Hospital survey data

- e. 3) For “Infections and Other Events” the MHA will have access to:

Infection / Event	From where?	Time frame	Note
A. Central-line associated bloodstream infection (CLABSI)	All inpatient locations	2010 through the end of HIIN	
B. Surgical Site Infection (SSI)	All inpatient locations	2010 through the end of HIIN	The MT HIIN will have access to data on all inpatient procedures that you have entered into NHSN. At a minimum you must report data on colon surgeries (COLO), abdominal hysterectomies (HYST), total hip replacements (HPRO) and total knee replacements (KPRO).
C. Catheter-associated urinary tract infection (CAUTI)	All inpatient locations except NICUs	2010 through the end of HIIN	
D. Ventilator-associated event (VAE)	All inpatient locations	2013 through the end of HIIN	

- MT HIIN expects data from all inpatient locations. For CAUTI, **if you are a facility with NICUs**, please exclude these locations from the CAUTI section (section c above).
- To exclude locations, click the arrow in the “Your locations” box and de-select that location. In the example below, location NQIWJK3 – WJK NICU has been de-selected for CAUTI and the MT HIIN will not have access to CAUTI data from that location.

The screenshot shows the NHSN data entry interface for the CAUTI section. The 'Your Locations' dropdown menu is open, displaying a list of locations with checkboxes. The location 'NQIWJK3 - WJK NICU' is currently unchecked, indicating it has been de-selected. The other locations shown are '[INACTIVE] NDNWJK4 - WJK TEST UNIT 4', 'NQI WJK 5 - WJK MED SURG', 'NQIWJK1 - WJK MEDICAL STEPDOWN', and 'NQIWJK2 - WJK MEDICAL CRITICAL CARE'. The 'Your Locations' box shows '9 selected'.

- Under MDRO/CDI events MT HIIN is asking for C. difficile laboratory ID events for the FACWIDEIN location from 2013 until the end of the project. FACWIDEIN refers to all of the facility’s inpatient units. Note: if you get an error message under “Your Locations” that says “No locations meet criteria,” please ignore it.

Emergency Department Transfer Communication (EDTC)

Required

- 1: Home Medications
- 2: Allergies and/or Reactions
- 3: Medications Administered in the ED
- 4: ED Provider Note
- 5: Mental Status/Orientation Assessment
- 6: Reason for Transfer and/or Plan of Care
- 7: Tests and/or Procedures Performed
- 8: Tests and/or Procedure Results
- All-EDTC: Composite of all 8 data elements

1. Identify Measure Population

Hospitals need to identify which Emergency Department cases fit in the measure population for reporting. The information on how to determine the patient population for the measure is found on the Population and Sampling page of the EDTC Data Specifications Manual available [here](#).

MBQIP Training Audio: [EDTC Data Specifications Overview](#)

A guided overview of how to abstract the EDTC measure using the Data Specifications Manual. We recommend having the manual open to follow along. (28-minute video)

2. Abstract the EDTC Measure Data

Hospitals must chart abstract the EDTC data elements to determine the numerator and denominator for the MBQIP program submission on a quarterly basis. Data can be collected via a tool from a vendor or by the use of an Excel-based data collection tool. MT Flex provides three data abstraction tool options, along with instructions, that can be found [here](#). The preferred method is Option 1 EDTC Excel Tool available at the link.

3. Submit the EDTC Data

Numerator and denominator data is submitted via email to the MT Flex Program (email: jennifer.wagner@mtha.org). You may submit the entire data file or a PDF of the quarterly report.

Data Submissions Must Be Timely!

EDTC Data Collection Tool Instructions

MT Flex has made subtle changes to the tool provided by Stratis Health in order to meet desires of Montana CAHs. MT Flex would like to give full credit to Stratis Health for development of the tool and the instruction manual. Original documents can be found [here](#).

1. Access the tool on the [PIN Website EDTC page](#). *You will only need one tool for each calendar year.*
 - Right click on the file.
 - Select “Save As”
 - Choose the location it will be easiest for you to find the tool; click save.
 - The tools requires the use of Macros to run. When you open the file for the first time click on the “Enable Content” button to enable Macros.

2. Once Macros are enabled you will see this screen

Emergency Department Transfer Communication
Data Collection Tool

Go Back to Initial Page

Run a Monthly Report

Run a Report by Discharge Disposition

Run a Report for MBQIP

Add a New Record

Total Records in Tool: 0

To Open or Delete, first select a Medical Record Number or Other Identifier. Then:

Open/Edit Record

Click on "Open Record" to open and review or edit that record.
If you wish to edit the Medical Record Number or Date of patient encounter on an existing record, make those edits and save, then delete the previous record.

Delete Record

Click on "Delete Record" to delete the record.
You must use this button to delete a record. Deleting using your keyboard will cause the tool to malfunction.

Name of person doing data collection	Medical Record Number or Other Identifier	Patient discharge disposition	Date of patient encounter

This will bring you to the **Patient Information Data Entry Form**. There are two sections to the Patient Information Data Entry Form.

In the top section (see next screenshot):

- **Cancel button:** Use this if you wish to cancel data entry. The tool will ask, "Are you sure you want to cancel without saving?" in case you hit this button accidentally.
- **Save button:** Use this to save data entry.
- **Print a Paper Copy button:** Use this to open a print preview of the entire data entry form that you can then send to a printer.
- **Enter patient medical record number (or other identifier) [REQUIRED]:** This is also for your own reference to use in tracking which transfers have been entered.
- **Enter date of patient encounter (MM/DD/YYYY) [REQUIRED]:** Enter the date for the patient transfer encounter in this yellow box.
- **Select patient discharge disposition (from drop-down list) [OPTIONAL]:** Click on the yellow box next to this item for a list of the drop-down options. Use the scroll bar in the drop-down list to see all options (per screenshot below).
- **Enter name of person doing data collection [OPTIONAL]:** This is for your own reference in case multiple people are abstracting or entering data.

Patient Information Data Entry Form

Cancel

Save

Print a Paper Copy

Enter patient medical record number (or other identifier)	
Enter date of patient encounter (MM/DD/YYYY)	
Select patient discharge disposition (from drop down list)	
Enter name of person doing data collection	

In the next section (see next screenshot), each of the eight yellow boxes has the options Yes, No, and (where pertinent) Not Applicable. Make sure you are utilizing the latest version of the specifications manual to answer each of the eight abstraction questions.

1	Does the medical record documentation indicate that the patient's current home medication list was sent to the receiving facility?	
	<ul style="list-style-type: none"> • Select Yes if there is documentation that the patient's current home medication list was sent to the receiving facility. • Select No if there is no documentation that the patient's current home medication list was sent to the receiving facility. 	

Once each required box is completed on the **Patient Information Data Entry Form**, click Save and choose to add to Database. If a required field has been missed a pop-up will appear. If you inadvertently enter a record that already exists, you will receive a notification message.

PATIENT LIST PAGE

A summary of the entered data will appear on the **Patient List Page**. To make changes use the **Open/Edit Record** or **Delete Record** buttons described below.

Run a Monthly Report

Run a Report by Discharge Disposition

Run a Report for MBQIP

Go Back to Initial Page

Add a New Record

Total Records in Tool: 1

To Open or Delete, first select a Medical Record Number or Other Identifier. Then:

Open/Edit Record

Delete Record

Click on "Open Record" to open and review or edit that record.
If you wish to edit the Medical Record Number or Date of patient encounter on an existing record, make those edits and save, then delete the previous record.

Click on "Delete Record" to delete the record.
You **must** use this button to delete a record. Deleting using your keyboard will cause the tool to malfunction.

Name of person doing data collection	Medical Record Number or Other Identifier	Patient discharge disposition	Date of patient encounter
My Name Here	ABC987	Other health care facility (Nursing Home	1/1/2019

Go Back to Initial Page

Add a New Record

Clicking this will take you back to the Initial Page. You shouldn't need to do this unless you need to update the name of your Critical Access Hospital or CCN (unlikely).

Whenever you wish to add a new record, click here.

Open/Edit Record

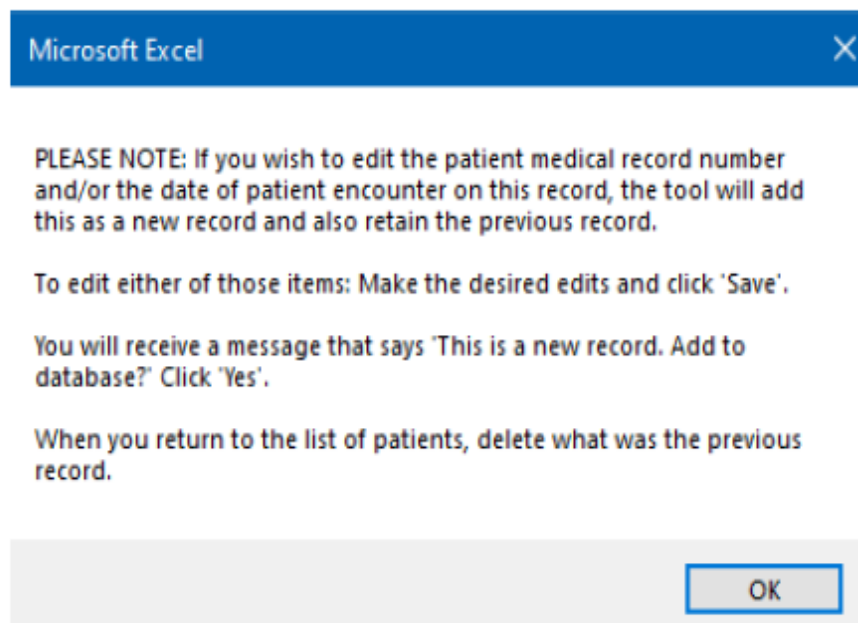

Delete Record

*Once you have entered a record, click on a medical record number in the record list and then click "Open/Edit Record" if you need to revisit or edit that record.

Click on a medical record in the record list and then click "Delete Record" if you wish to delete it. Use this button, NOT your keyboard, to delete the record.

*Important Open/Edit Record details

If you click "Open/Edit Record," you will receive the following message:

To edit anything except the Medical Record Number (or other identifier) and/or Date of patient encounter, simply make the edits desired and then click "Save." The tool will prompt you to verify that you wish to save since saving will overwrite the existing record. Click "Yes" to retain the edits or "No" to cancel out of the edits.

If you edit the Medical Record Number (or other identifier) and/or Date of patient encounter when you click "Save," the tool will consider the record a new record. This is working correctly! When you return to the **Patient List page**, just make sure to delete what was the previous record.

Running Reports

At any time, you can run one of three reports from the **Patient List** page:

Run a Monthly Report

Run a Report by Discharge
Disposition

Run a Report for MBQIP

Go Back to Initial Page

Add a New Record

Total Records in Tool: 4

To Open or Delete, first select a Medical Record Number or Other Identifier. Then:

Open/Edit Record

Click on "Open Record" to open and review or edit that record.
If you wish to edit the Medical Record Number or Date of patient encounter on an existing record, make those edits and save, then delete the previous record.

Delete Record

Click on "Delete Record" to delete the record.
You **must** use this button to delete a record. Deleting using your keyboard will cause the tool to malfunction.

Report for MBQIP

This report provides a quarterly snapshot of performance using all data entered to-date, for a calendar year of your choice. This report page also includes an option to export the report into a basic, unformatted Excel file stripped of all unnecessary details and potential PHI. The file can then be submitted for quality reporting purposes, including MBQIP.

**Emergency Department Transfer Communication
Hospital Report - Overall**

Hospital Name: Sample Hospital

CMS Certification Number: 123456

Year of Report: 2019

Discharge Disposition Shown: All

Print Report

Return to Patient List

Refresh Report

Export Report for Submission

Data Elements	Q1 2019		Q2 2019		Q3 2019		Q4 2019	
	# of Records Reviewed (N)		# of Records Reviewed (N)		# of Records Reviewed (N)		# of Records Reviewed (N)	
	n	%	n	%	n	%	n	%
1. Home Medications	4	100.00%	N/A	N/A	N/A	N/A	N/A	N/A
2. Allergies and/or Reactions	3	75.00%	N/A	N/A	N/A	N/A	N/A	N/A

Use the “Export Report for Submission” button to export the report as a basic, unformatted Excel file stripped of all unnecessary details and potential PHI. Upon clicking the “Export Report for Submission” button the following message will appear:

Microsoft Excel

If you have already exported a report today, that report will be overwritten if you continue. Are you sure you want to continue?

Yes

No

If you click “Yes,” the report will be exported to the same file location as where your tool is stored. If you click “No,” no report will be exported.

The report exported from the “Export Report for Submission” button will be named with the naming convention:

Flex Report – Your 6-digit CCN here – DDMonYYYY (date report was run, where DD is the day, Mon is the 3-letter abbreviation for the month, and YYYY is the year)

For example: **Flex Report – 123456 – 21Oct2019**

For Critical Access Hospitals participating in MBQIP, this report can be submitted to your state Flex coordinator for EDTC reporting requirements.

Using the reports

All three reports work similarly. Any boxes shaded yellow can be updated. Enter the year of interest in the yellow box next to “Year Report” to run a report for that year. Click the “Refresh Report” button on the right if the report does not automatically update. Note that it may take a moment for the tool to re-run calculations when you change the year of interest.

Buttons common to all three reports:

- **Print Report button:** Use this to open a print preview of the entire report, which you can then send to a printer.
- **Return to Patient List button:** Use this to return to the **Patient List page**.
- **Refresh Report button:** This will refresh the report.

Other items to be aware of

- The tool can be used in OneDrive, SharePoint, and as a desktop application. For those with Office 365, note that the tool does not function as intended in Excel Online – make sure to open it via an Excel desktop application rather than in Excel Online.
- The tool is only meant to hold data for a single hospital. If you update the hospital name or CCN on the **Initial Page** this does not reset the **Patient List page**, or any other details already entered – it simply updates the hospital name in the reports. If you need to enter data for another hospital, download a separate tool for that hospital.
- Be patient when running reports – the tool takes a bit of time to run its calculations.
- The tool will hold a MAXIMUM of 2,000 records. We suggest downloading a new tool for each calendar year to minimize performance issues, but if you choose to continue using it for multiple years, make sure to monitor the number of records.

BLANK PAGE

OUTPATIENT MEASURES

ED Throughput

AMI

BLANK PAGE

Outpatient Measures

Required

OP-2: Fibrinolytic Therapy Received within 30 minutes

OP-3: Median Time to Transfer to another Facility for Acute Coronary Intervention

OP-18: Median Time from ED Arrival to ED Departure for **discharged** ED patients

OP-22: Patient Left Without Being Seen (Yearly)

Additional

This measure is not worked on by Montana.

OP-23: ED: Head CT or MRI Scan Results for Acute Ischemic Stroke or Hemorrhagic Stroke Patients who Receive Head CT or MRI Scan Interpretation Within 45 Minutes of ED Arrival.

1. Identify Measure Population

Hospitals need to identify which outpatient cases fit in the measure population for reporting. The information on how to determine the initial patient population for each measure is found in the related Measurement Information section of the [Hospital Outpatient Quality Reporting Specifications Manual](#) on QualityNet. Align the encounter period with the correct manual version. The manual for MBQIP required outpatient measures for calendar year 2020 (ver. 13.0a) is included in the Montana MBQIP Guide.

MBQIP Training Video: Data Abstraction Training Video Session 1 – [Locating CMS Specification Manuals](#). Since this video, QNet has updated their website, but education of use of the manuals is still accurate. (13-minute video).

2. *IMPORTANT! Enter Outpatient Population and Sampling Counts (ZERO POPULATION SUBMISSION)

Hospitals are encouraged to submit aggregate population and sample size counts for Medicare and non-Medicare discharges for each chart abstracted required measure quarterly via the QualityNet Secure Portal. At the very least, measures with zero population must be entered to count for participation and data submission. Information on how to determine the clinical measure population and sampling requirements are found in the Measurement Information sections and the Population and Sampling Specification section of the [Hospital Outpatient Quality Reporting Specifications Manual](#) on QualityNet.

Be sure to reference the manual for the discharge time period you are currently abstracting.

3. Population and Sample size counts are submitted via the QualityNet Secure Portal in the Hospital Outpatient Population and Sampling application, located under Quality Programs, then under My Tasks.

- Log into the [QualityNet Secure Portal](#)
- In the “Select Your QualityNet Destination” drop down, select **Hospital Quality Reporting** and **Let’s Go**. Log in with your information then this will bring up the My Tasks page.
- Look for Hospital Reporting Inpatient/Outpatient; select View/Edit Population & Sampling.

The screenshot shows the CMS QualityNet homepage. The navigation bar includes links for Home, Quality Programs, My Reports, and Help. Below the navigation bar, the breadcrumb trail reads: Home > Quality Programs > Hospital Quality Reporting: IQR, OQR, ASCQR, IPFQR, PCHQR. The main heading is "Quality Reporting System: My Tasks". On the left, under "User Role Management", are links for Create User, Approve User, and Edit User. On the right, under "Hospital Reporting Inpatient / Outpatient", is a link for "View / Edit Population and Sampling" with a blue arrow pointing to it.

- a. Select Outpatient Population & Sampling.

The screenshot shows the "Population and Sampling | Inpatient/Outpatient Selection" screen. The breadcrumb trail is: Home > Quality Programs > Hospital Quality Reporting: IQR, OQR, ASCQR, IPFQR, PCHQR > Hospital Reporting Inpatient / Outpatient > View / Edit Population and Sampling. The main heading is "Population and Sampling | Inpatient/Outpatient Selection". Below this, a box titled "Please Select the Population and Sampling Program:" contains two radio button options: "Inpatient Population and Sampling" and "Outpatient Population and Sampling".

- b. Enter your facility's CCN; click Continue.
- c. Select the reporting period for which you are submitting data; click Continue.

The screenshot shows the "View / Edit Population & Sampling for:" form. It has a section for "Provider Name and CCN:" with a text input field. Below this is a "Reporting Period:" dropdown menu currently set to "Q2 2016". A "Continue" button is at the bottom. A tooltip points to the dropdown menu with the text: "Required Field. Select one reporting period from the dropdown list".

- d. Enter the number of cases in the grids for each measure set. Enter zero if no cases.

The screenshot shows the "Acute Myocardial Infarction" data entry screen. It includes instructions for "Population fields" and "Sample Size fields". Below the instructions is a table for data entry. The table has columns for "Population", "April", "May", and "June". The rows are "Medicare" and "Non-Medicare". Each cell in the table contains a text input field with a "0" inside. A tooltip points to the "Non-Medicare" row for "June" with the text: "Enter Initial population Non-Medicare size for June Q2 2016 Column". A "Continue" button is at the bottom right.

Population	April	May	June
Medicare	0	0	0
Non-Medicare	0	0	0

- e. Review the summary screen and click Continue.
- f. Choose to Save, or if there are errors Edit.
- g. When it is complete there will be a pop up that says “Update Successful”. Click Okay.

3. Abstract CMS Outpatient Measure Data using CART or a vendor tool.

Hospitals must chart abstract and submit complete data quarterly for the required clinical process measure sets **AMI/Chest Pain (OP-2, OP-3) and ED-Throughput (OP-18)**. For further information on how to collect this data, reference the [Hospital Outpatient Quality Reporting Specifications Manual](#) on QualityNet

Be sure you reference the manual for the discharge time period you are currently abstracting.

The Outpatient CART application is available at no charge. Instructions on CART downloading and information can be found page 11 of this guide. Be sure to use the version that includes the data submission discharge time frame.

CMS Training Video: [CART Outpatient Quality Reporting \(OQR\): Knowing the Basics](#).

This video reviews the steps required for entering abstractions into CART. This presentation will also demonstrate how to export your abstractions and submit your data into the QualityNet Secure File Transfer. (43-minute video)

4. Submit CMS Outpatient Web-Based Measures (Yearly, May)

ED Throughput measure OP-22 is collected using administrative data to determine the measures’ denominator population; there is no individual chart abstraction. Data is collected on a yearly, not quarterly basis. Data is submitted the year following the encounter period, through the QualityNet Secure Portal’s Web-based data collection tool. For further information on how to collect this data, reference the [Hospital Outpatient Quality Reporting Specifications Manual](#) on QualityNet.

- a. Log into the [QualityNet Secure Portal](#)
- b. In the “Select Your QualityNet Destination” drop down, select **Hospital Quality Reporting** and **Let’s Go**. Log in with your information then this will bring up the My Tasks page.
- c. Click on the link in the **Manage Measures** box.

Manage Measures

[View/Edit Structural/Web-Based Measures/Data Acknowledgement \(DACA\)](#)

- a. Click on Outpatient Web-Based Measures link.
- b. Choose Payment Year (two years after the year of data submitted. Example - 2019 Data, Payment Yr 2021
- c. Click on OP-22
- d. Enter Numerator and Denominator, hit TAB key.

OP-22: Left Without Being Seen

Numerator

* What was the total number of patients who left without being evaluated by a physician/APN/PA?

Denominator

* What was the total number of patients who presented to the ED?

Back Calculate Submit Print

- e. Click on Calculate Percentage
- f. Choose Submit (can print if you want for your records)

5. Submit Data to the CMS Warehouse (QualityNet)

Clinical data submission is accomplished in one of two ways: uploading from Outpatient CART or by a third party vendor. Third party vendors must be able to meet the Measurement Specifications for data transmission via the QualityNet Secure Portal to the CMS Clinical Warehouse. To authorize a vendor to submit data on the hospital's behalf, the online authorization process can be found through the QualityNet Secure Portal.

Data Submissions Must Be Timely!

	Q1	Q2	Q3	Q4
AMI & Chest Pain Measures	CMS	CMS	CMS	CMS
OP-2	August 1	November 1	February 1	May 1
OP-3	August 1	November 1	February 1	May 1
ED Throughput Measures				
OP-18	August 1	November 1	February 1	May 1
OP-22	Previous calendar year (Jan-Dec) due May 15			

6. Check Submitted Cases

After your data is submitted to the QualityNet warehouse you will get confirmation that data was received via email. To check and make sure the data was accepted and not rejected, run the Case Status Summary Report out of QualityNet. Reports are located through the QualityNet Secure Portal. To Run the Case Status Summary Report:

- a. Log into the Hospital Quality Reporting section of the QNet Secure Portal.
- b. Click on My Reports and select Run Reports from the I'd Like To.... List
- c. Select OQR from the Report Program drop-down menu
- d. Select Hospital Reporting – Feedback Reports from the list in the Report Category drop-down menu
- e. Select View Reports to display a list of report names
- f. Select Hospital Reporting – Case Status Summary Report under Report Name
- g. Select the quarter and measure sets for the data you have just submitted
- h. Select Run Reports at the bottom of the screen

- i. If the report shows cases have been rejected, run the Submission Detail Report (same process, but select this report). This report will show you why the case is being rejected. Correct and submit any applicable cases.
- j. Do not wait until right before the due date to submit and check on data. Once the due date has passed, no further data will be accepted for the quarter.

There are no inpatient measures for 2020

PATIENT SAFETY MEASURES

ANTIBIOTIC STEWARDSHIP PROGRAMS
HEALTHCARE PROVIDER (HCP) FLU IMMUNIZATION

BLANK PAGE

Patient Safety

Required

HCP/IMM-3 (formerly OP-27): Influenza Vaccination Coverage among Healthcare Personnel (HCP)

Antibiotic Stewardship – NHSN Annual Facility Survey

Additional

These measures are tracked and worked on by MT CAHs. Data submission is done via MT Flex/PIN Benchmarking or the MT-HIIN

Healthcare Associated Infections (HAI):

CLABSI: Central Line-Associated Bloodstream Infection

CAUTI: Catheter-Associated Urinary Tract Infection

C.diff: Clostridioides difficile Infection (CDI)

MRSA: Methicillin-resistant Staphylococcus Aureus Infection.

1. Enroll Hospital in NHSN (National Healthcare Safety Network)

To report these measures, your hospital must be enrolled in NHSN. If you are unsure of your hospital's status with NHSN, email them at: nhsn@cdc.gov

If your hospital is not already enrolled in NHSN, the instructions for enrollment can be found [here](#).

2. Gather Influenza Vaccination Data

Hospitals report healthcare personnel (HCP) influenza vaccination coverage in the Healthcare Personnel Safety Component of NHSN. The [HCP Influenza Vaccination Summary Protocol](#) is a guide to collecting and reporting influenza vaccination summary data for the HCP Vaccination Module.

3. Submit HCP Influenza Vaccination Summary Data

Hospitals are only required to report HCP Influenza Vaccination Summary Data in NHSN once a year, at the conclusion of the reporting period (October 1 through March 31). Resources and instructions on how hospitals submit HCP influenza data can be found [Surveillance for Healthcare Personnel Vaccination webpage](#).

NHSN Training Video: [Healthcare Professional Flu Measure](#).

This video provides an overview of the Healthcare Professional Flu measure (OP-27), including how to sign up for an account through NHSN, the measure submission process and available quality improvement support. (86-minute video)

Data Submissions Must Be Timely!

PATIENT SAFETY	NHSN (National Health Safety Network)
Healthcare Worker Immunization	May 15 Flu Season (Oct 1 – Mar 15)

4. Complete the NHSN Patient Safety Component Annual Facility Survey

This survey will be used to measure the required Antibiotic Stewardship work. Data is completed during the first quarter of a calendar year based on information from the previous year.

A copy of the survey can be found [here](#) and is included in the Montana MBQIP Guide
The instructions for completion of the survey can be found [here](#) and are included in the Montana MBQIP Guide.

Assessing the survey in NHSN:

- If the hospital has only been reporting on the Influenza Vaccination Coverage Among Healthcare Personnel measure, they will need to select the Patient Safety Component to access the survey.
- Hospitals that submit HAI measures via NHSN do so through the Patient Safety Component, and completion of the annual facility is required for submission of HAI data.

For further information on timeframes and how to report the additional measures in NHSN; please contact Jennifer Wagner (Jennifer.wagner@mtha.org) and Casey Driscoll (casey.driscoll@mtha.org).

Required HCAHPS Survey

1. Decide Process for HCAHPS Survey Implementation

HCAHPS is a standardized survey instrument and data collection methodology for measuring patients' perceptions of their hospital experience. The survey can be implemented by either the hospital, or a vendor representing the hospital.

Training materials for hospitals that plan to self-administer the survey can be found [here](#).

It should be noted that the requirements for implementing the survey are quite stringent so most hospitals choose to have their survey process done by a vendor. An updated list of approved vendors can be found at on the HCAHPSOnline website [here](#). For more information about approved vendors, including those that work specifically with small rural hospitals, see the [HCAHPS Vendor Directory](#) from the National Rural Health Resource Center.

2. Conduct the HCAHPS Survey

There are four approved methods of conducting the survey:

- Mail Only
- Telephone only
- Mixed (mail followed by telephone)
- Interactive Voice Response (IVR).

3. Submit HCAHPS survey data

The survey data must be submitted via QualityNet in the specified Microsoft Excel XML file format by a registered QualityNet user. Data may be submitted by the hospital or a vendor representing the hospital.

HCAHPS data is submitted to QualityNet on a quarterly basis. Refer to the [MBQIP Reporting Submission Deadlines](#) for timeframes.

For more information about the HCAHPS initiative, see HCAHPSOnline.org

MT Note:

If you are curious, survey instruments can be found at <https://www.hcahpsonline.org/en/survey-instruments/>. It is the responsibility of your vendor to send the appropriate version.
