

# Readmissions Discovery Tool

Review a minimum of 5 and a maximum of 10 medical records.

## Focus:

For this review, focus on the review of medical records of currently readmitted patients. You will need to review the index (first admission) medical record, along with the current readmission medical record. In addition, whenever possible, it is important to interview the patient to find out reasons for readmission in the patient's own words.

## Instructions:

When reviewing the medical record, if documentation is found for the process, mark "**Yes**" in the box. If documentation is not found for the process, mark "**No**". If the process being reviewed is not applicable to the medical record, mark "**N/A**". After completing the review of all records, note the rows with the highest number of "No" responses. This will identify priority focus areas for improvement.

**Note:** Do not spend more than 20-30 minutes per medical record.

**SUBMIT YOUR DISCOVERY TOOL FINDINGS WHEN COMPLETE:** Take a 2 minute survey to report your findings. By submitting your findings, you will have taken the time to identify process gaps in which to focus improvement and to guide educational activities.
