

Outpatient eCQM – Appropriate Treatment for STEMI Patients in the ED (OP-40)

- Background – New CMS OQR (starting in CY 2023)
- Submission – Annual, QRDA Category 1 File via HQR
- Description – Percentage of ED encounters for patients 18 and older with diagnosis of STEMI that received appropriate treatment:
 - Fibrinolytic therapy within 30 minutes of ED arrival
 - Percutaneous coronary intervention (PCI) within 90 minutes of ED arrival
 - Transfer within 45 minutes of arrival
- Additional Information
 - Clinically similar to current chart-abstracted OP-2 and OP-3, which retire after Q1 2023 encounters
 - [Measure specifications](#)
