

Overdose prevention						
Measure	Stage 0 (0 pt.) <i>Getting started</i>	Stage 1 (1 pt.) <i>Basic management</i>	Stage 2 (2 pts.) <i>Hospital wide standards</i>	Stage 3 (3 pts.) <i>Integration &amp; innovation</i>	Stage 4 (4 pts.) <i>Practice Improvement</i>	Stage 5 (5 pts.) <i>Sustainability</i>
<p><b>Naloxone education and distribution program</b></p> <p>Provide naloxone prescriptions and education to all patients, families, caregivers, and friends discharged with an opioid prescription and/or at risk of overdose.</p> <p>*Staff include MD, PA, NP, Pharmacist, RN, LVN, Health Coach, Substance Use Navigator, Clinical Social Worker, Research Staff, Emergency Department Technician, Clerk, Medical Assistant, Security Guard, etc. trained to distribute naloxone and provide education on how to use it</p>	<p>Hospital <b>does not engage in overdose prevention</b> strategies</p>	<p><b>Identify overdose prevention &amp; other harm reduction resources within hospital, health system, and community</b> (e.g., community access points, low/no-cost options, community pharmacies with naloxone on hand, community coalitions, safe injection sites, safe opioid disposal sites, community access points for fentanyl test strips, etc.)</p>	<p><b>Standard workflow</b> for MDs and physician extenders in place for providing naloxone prescription at discharge for patients with a long-term opioid prescription and/or at risk of overdose; discharge prescriptions sent to patient's pharmacy of choice (e.g., naloxone incorporated into a standard order set for appropriate opioid prescriptions, and/or referral to low or no cost distribution centers, etc.)</p>	<p><b>Standing order</b> in place allowing approved staff* to educate and distribute naloxone in hand to all patients, caregivers, at no cost while in the hospital setting under the <a href="#">Montana Statewide Standing Order for Naloxone Opioid Antagonist</a>. See the MT DPHHS <a href="#">Be Ready to Respond</a> website for details and resources.</p>	<p>Your hospital is actively <b>measuring and developing strategies to improve</b> access to naloxone &amp; other harm reduction services</p>	<p>Hospital has <b>achieved its performance target</b> on related key performance indicators, with sustained performance over a 12-month period</p> <p>Hospital continues to <b>monitor performance</b> but providing free naloxone kits to patients and families is no longer an active QI initiative</p> <p><b>Great job!</b></p>
	<p><b>Extra credit (1 pt.)</b> Your hospital provides patients and families one or more of the following harm reduction services: access to low cost or no cost fentanyl test strips and safe injection kits, and information on how to properly store and dispose of opioid medications</p>
